ABSTRACT

Almeria, Jovy Ann A. and Pagapos, Roldan A. **KALAHI-CIDSS: A Comparison on the Collaboration of NGO-GO-PO for Development in Insurgent and Non-Insurgent Affected Areas.** A research project submitted to the Division of Social Sciences, College of arts and Sciences, University of the Philippines in the Visayas, Miag-ao, Iloilo.

This study examines the dynamic of collaboration of the three actors, the NGO, GO and PO for development in two different barangays; one having an insurgency problem and the other barangay with no insurgency problem and these two barangays are KALAHI-CIDSS grantees. The study had three guiding objectives.

Two selected barangays in the Municipality of Jamindan, Capiz, the barangay captains of the said barangays including the Philippine Army, area coordinator of KALAHI-CIDSS in Jamindan and the DILG personnel composed the subjects of the study. In-depth interview and archival research were conducted to gather necessary information to answer the objectives of the study.

The results of the study revealed that the dynamics of collaboration of NGO, GO and PO for development vary depending on the nature of the barangay. There have been apparent manifestations that the collaboration of NGO, GO and PO for development (KALAHI-CIDSS Program) have been effective in alleviating the poverty problem of the barangay as well as solving the problem of insurgency.
